

1 First header

1.1 Second header

1.1.1 Third header

Plain text is much the same, even in L^AT_EX.

Here is **bold face**

Here is *italic text*

Here is `plain text`.

“Use double back ticks and single quotes to start and finish a quotation.”

- first bullet
- second bullet
- third bullet

1. number one
2. number two
3. number three

This is more convenient for a larger block of verbatim text.
This is equivalent to the ````` plain fencing ````` from markdown.

Again, works better for a much more extensive paragraph of quoted text such as this.

```
> x <- runif(10)
> y <- runif(10)
> plot(x,y)
```

Use the “escape” sequence to show a percentage sign like this: %.
